

**“Photosynthesis Enhancement”
with
“Bio-Stimulant Nutrients.”**

"Plant Renewal" : It is a combination of phytonutrients that can stimulate the healthy growth of leaves; it contains nutrients to promote larger and longer leaves that stimulate large amounts of sugar for plants.

Plant Renewal provides the necessary nutrient balance for the roots, allowing the taproots and hair roots to spread widely. In expanding the growth of the root system, thereby improve intake of nutrients and groundwater.

More than 300 acres
already tested in
Sarawak and Pahang.

After “**Photosynthesis
Enhancement**” is applied
within 3 months, most trees
will have strong, stout and
straight fronds. Then follow
by healthy numbers of
flowers, and larger fruits
bunches.

Stout and straight fronds within
3 months

Better flowers setting and
bigger fruits within 5 months

All you need to do is to try 10 acres with “Photosynthesis Enhancement” for 6 months; the first sign to better yield is larger and dark green Palm Fronds.

This fresh fruits' bunch
reached 76 kilos.

40+ kg bunches with Enhanced
Photosynthesis.
